

## Series Basic N3850A

---

Mobile safe with motorized electronic digital lock

## Characteristics

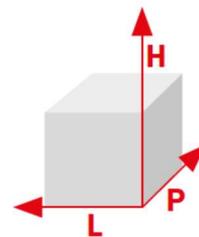

### • Made with Laser System Technology

- "High tech" laser cutting, monobloc front frame with cutting gap between frame and door of only 2/10 mm
- 3 mm special steel structure and **8 mm** thick front
- Full compartment opening
- Oversized hinge with self-lubricating bushes, anchored to the front in a defiled position
- Fully robotized high-resistance welding
- Epoxy painting with double phosphating
- Special door stops specifically designed to effectively resist break-in attempts with a sledgehammer
- Anchoring holes on the bottom and back
- Supplied with fixing plugs
- Removable shelves

## Locking system

- Electronic release lock with motorized deadbolt drive
- Microprocessor with proprietary technology
- Deadbolts in carbonitrided and nickel-plated steel, diameter 22 mm
- User code from 6 to 10 digits or letters
- Non-volatile memory for code retention in the absence of power
- 12-key membrane keyboard
- Audible and optical feedback with red and green LED of typing, error, low batteries
- Power supply via 4 1.5 Volt AA alkaline batteries (NO rechargeable batteries)
- Keypad lock (20") after 3 incorrect code entries
- Emergency opening with release key, 2 keys supplied
- Internal LED courtesy light when opening the door.
