

Series SKUDO Safes

Stainless steel magnetic protector for double bit key safes

Characteristics

SKUDO Safes is a security upgrade designed specifically for safes with older locks.

Ideal for improving the protection of old double-bit locks, there is no need to replace the safe: thanks to its easy installation, **SKUDO Safes** can be applied in just a few minutes and increases the resistance of the lock, making it resistant to drills, lock picks and other burglary tools.

MAXIMUM RESISTANCE, Stainless steel body with anti-drill front plate.

EASY INSTALLATION, It can be mounted quickly, even on old safes, drilling is made easy using an adhesive template

UNIVERSAL, Compatible with all double-bit locks installed on our Safes.

MODERN AND RESISTANT DESIGN, Minimal, solid, discreet and designed to last over time.

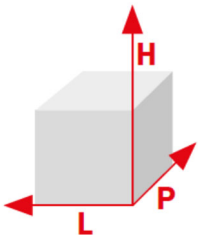

- Material: stainless-steel
- Thickness: 10,2 mm
- Finish: natural stainless-steel
- Weight: 0,95 kg
